

Water Treatment

Client ConocoPhillips Indonesia
Project North Belut Field Development
Location Offshore, Indonesia
Delivery 2008

Plant Details

2 x Multi-Function Sand Wash
Packages
WHP-C & WHP-D

Sand is flushed from Production Separators, and collected in these packages. The sand is washed of oil to allow sand discharge, while water is recycled for washing re-use.

Solids Inlet Concentration: < 204,000 ppmv

Solids Outlet Concentration: < 35 ppmv

Sand Handling and Cleaning Package for WHP-D
nearing completion at Batam works, Indonesia 2007.
